

Saubhagya Tiwari

Kanpur — +91-8471078495 — saubhagyatiwari19@gmail.com — [LinkedIn](#) — [GitHub](#) — [Portfolio](#)

OBJECTIVE

B.Tech Computer Science and Engineering (AI/ML) student with hands-on experience in Full Stack Web Development, Machine Learning, and Natural Language Processing. Passionate about building scalable applications and intelligent systems that solve real-world problems. Seeking Software Development or Machine Learning internship opportunities.

EDUCATION

Pranveer Singh Institute of Technology, Kanpur	2023 – Present
Bachelor of Technology in Computer Science and Engineering (Artificial Intelligence and Machine Learning)	
Percentage – 67.7% (till 6th semester)	
Youhe Public School, Lucknow	2022
Intermediate (Class XII) – 67.83%	
Youhe Public School, Lucknow	2020
High School (Class X) – 84.16%	

PROJECTS

Finance Tracker Web Application	GitHub	Live
HTML, CSS, JavaScript, Node.js, Express.js, MySQL, Chart.js		
- Developed a full-stack finance management platform to manage income, expenses, and budgets efficiently. - Implemented authentication, transaction management, category-wise budgeting, and expense tracking. - Built REST APIs using Express.js and integrated them with a responsive frontend dashboard. - Designed an analytics dashboard with category-wise expense tracking and budgeting features.		
Fake News Detection System	GitHub	Live
Python, Scikit-learn, NLP, TF-IDF, EasyOCR, Express.js		
- Built a machine learning system to classify news articles as fake or real using NLP techniques. - Applied text preprocessing, TF-IDF vectorization, and classification pipelines. - Added support for URL-based news verification and OCR-based image news detection using EasyOCR. - Achieved 98.44% classification accuracy on the test dataset using TF-IDF vectorization.		
Media and Text Summarizer with Q&A	GitHub	Live
Python, Transformers, BART, NLP, PyPDF2		
- Developed an NLP application to generate concise summaries from long documents and PDFs. - Integrated transformer-based summarization using Facebook BART models. - Implemented question-answering functionality based on summarized content. - Reduced document reading time by generating concise summaries from long-form content.		

TECHNICAL SKILLS

- Programming Languages:** Java, Python, C, C++, JavaScript
- Frontend Technologies:** HTML5, CSS3, JavaScript, React.js
- Backend Technologies:** Node.js, Express.js, REST APIs
- Databases:** MySQL
- Machine Learning & NLP:** Scikit-learn, TensorFlow, Transformers, TF-IDF, NumPy, Pandas, EasyOCR
- Tools & Platforms:** Git, GitHub, VS Code
- Core Computer Science:** Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems

ACHIEVEMENTS & CERTIFICATIONS

- Solved 400+ coding problems across multiple coding platforms.
- Achieved a 5-Star rating in HackerRank Problem Solving and a 4-Star rating in HackerRank C++.
- Earned HackerRank certifications in Problem Solving (Basic), Python (Basic), and SQL (Intermediate).
- Completed the Introduction to Git and GitHub certification offered by Coursera.
