

Saubhagya Tiwari

Kanpur, Uttar Pradesh — +91-8471078495 — saubhagyatiwari19@gmail.com — [LinkedIn](#) — [GitHub](#)

OBJECTIVE

B.Tech Computer Science and Engineering (AI/ML) student with hands-on experience in Full Stack Web Development, Machine Learning, and Natural Language Processing. Passionate about building scalable applications and intelligent systems that solve real-world problems. Seeking Software Development or Machine Learning internship opportunities.

EDUCATION

Pranveer Singh Institute of Technology, Kanpur Bachelor of Technology in Computer Science and Engineering (Artificial Intelligence and Machine Learning)	2023 – Present
Youhe Public School, Lucknow Intermediate (Class XII)	2022
Youhe Public School, Lucknow High School (Class X)	2020

PROJECTS

Finance Tracker Web Application HTML, CSS, JavaScript, Node.js, Express.js, MySQL, Chart.js	GitHub	Live
- Developed a full-stack finance management platform to manage income, expenses, and budgets efficiently. - Implemented authentication, transaction management, category-wise budgeting, and expense tracking. - Built REST APIs using Express.js and integrated them with a responsive frontend dashboard. - Designed an analytics dashboard with category-wise expense tracking and budgeting features.		
Fake News Detection System Python, Scikit-learn, NLP, TF-IDF, EasyOCR, Express.js	GitHub	Live
- Built a machine learning system to classify news articles as fake or real using NLP techniques. - Applied text preprocessing, TF-IDF vectorization, and classification pipelines. - Added support for URL-based news verification and OCR-based image news detection using EasyOCR. - Achieved 98.44% classification accuracy on the test dataset using TF-IDF vectorization.		
Media and Text Summarizer with Q&A Python, Transformers, BART, NLP, PyPDF2	GitHub	Live
- Developed an NLP application to generate concise summaries from long documents and PDFs. - Integrated transformer-based summarization using Facebook BART models. - Implemented question-answering functionality based on summarized content. - Reduced document reading time by generating concise summaries from long-form content.		

TECHNICAL SKILLS

- Programming Languages:** Java, Python, C, C++, JavaScript
- Frontend Technologies:** HTML5, CSS3, JavaScript, React.js
- Backend Technologies:** Node.js, Express.js, REST APIs
- Databases:** MySQL
- Machine Learning & NLP:** Scikit-learn, TensorFlow, Transformers, TF-IDF, NumPy, Pandas, EasyOCR
- Tools & Platforms:** Git, GitHub, VS Code
- Core Computer Science:** Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems

ACHIEVEMENTS & CERTIFICATIONS

- Solved 400+ coding problems across multiple coding platforms.
- Achieved a 5-Star rating in HackerRank Problem Solving and a 4-Star rating in HackerRank C++.
- Earned HackerRank certifications in Problem Solving (Basic), Python (Basic), and SQL (Intermediate).
- Completed the Introduction to Git and GitHub certification offered by Coursera.
